DETAILED ACTION

Claims 1-24 are pending. Applicants cancelled claims 25-27 in a preliminary amendment.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, drawn to a freeze-dried interferon-gamma composition.

Group II, claim(s) 15-24, drawn to a dry powder interferon-gamma inhalation system comprising (1) a vessel housing a freeze-dried interferon-gamma composition and (2) a device comprising a means capable of applying an air impact having an air speed of at least 1 m/sec and an air flow rate of at least 17 ml/sec.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-II have different special technical features. The special technical feature of Group I is the freeze-dried interferon-gamma composition comprising (i) at least one hydrophobic stabilizer, (ii) at least one hydrophilic stabilizer and having (a) a non-powder cake-like form, (b) a disintegration index of 0.015 or more; and (c) forming fine particles with a mean diameter of 10 microns or less or a fine particle fraction of 10% or more upon impaction with air having a speed of at least 1 m/sec and a flow rate of 17 ml/sec. The special technical feature of Group II is the device having a means capable of providing an air speed of at least 1 m/sec and a flow rate of 17 ml/sec.

A telephone call was made to Mr. Arthur Garrett on April 18, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James H. Alstrum-Acevedo whose telephone number is (571) 272-5548. The examiner can normally be reached on M-F, 9:00-6:30, with every other Friday off.
